NORTH-HOLLAND PUBLISHING COMPANY — AMSTERDAM

NUCLEAR INSTRUMENTS AND METHODS

A journal on accelerators, instrumentation and techniques in nuclear physics

EDITOR: K. SIEGBAHN, UPPSALA

EDITORIAL BOARD:

J. B. ADAMS (Abingdon, Berks.)
F. A. ALSINA (Caracas)
E. AMALDI (Rome)
H. L. ANDERSON (Chicago)
K. T. BAINBRIDGE (Cambridge, Mass.)
P. R. BELL (Houston)
R. E. BELL (Montreal)
H. BRINKMAN (Groningen)
E. H. COOKE-YARBOROUGH (Harwell)
M. DE HEMPTINNE (Louvain)
A. DE-SHALIT (Rehovoth)
M. DEUTSCH (Cambridge, Mass.)
S. DU TOIT (Pretoria)
B. S. DŽELEPOW (Leningrad)
W. GENTNER (Heidelberg)
F. S. GOULDING (Berkeley)
O. HAXEL (Heidelberg)
R. L. HEATH (Idaho Falls)
P. HUBER (Basel)
S. KIKUCHI (Tokyo)
J. KOCH (Copenhagen)
M. S. KOSODAEV (Moscow)
S. LIVINGSTON (Cambridge, Mass.)
E. M. McMILLAN (Berkeley)
M. G. MESCHERYAKOV (Moscow)
P. B. MOON (Birmingham)
M. L. OLIPHANT (Canberra)
W. PAUL (Bonn)
A. S. RAO (Bombay)
G. SALVINI (Rome)
P. SAVIĆ (Belgrade)
CH. SCHMELZER (Heidelberg)
R. TANGEN (Oslo)
D. TAYLOR (Glasgow)
R. VAN LIESHOUT (Amsterd.)
G. VON DARDEL (CERN)
O. WERNHOLM (Stockholm)
R. R. WILSON (Cornell)
S. D. WINTER (Saclay)

INFORMATION TO AUTHORS

Contributions, written in English, French or German, and books for review may be sent either direct to the Editor, Professor K. Siegbahn, Institute of Physics, University of Uppsala, Sweden, or to one of the members of the Editorial Board.

Short contributions of *less than 1500 words* and not subdivided into sections, may be published as Letters to the Editor, in a shorter time than regular articles as the proofs will normally be corrected by the publisher.

Before mailing the manuscript, please check the following points:

1. Is there an *abstract* in English? (Letters to the Editor should have an abstract of *less than 30 words*.)
2. Have you given the name(s) of the author(s) on the manuscript and the name and address of the institute where the research work was done? (Proofs will be sent by the publisher to this address.)
3. Is the manuscript clearly typewritten, with ample space between the lines, is the subdivision logical, and are the text and figures *ready for printing?* (It is impracticable to send alterations during the printing process. The galley proof which will be sent to you serves only to correct actual printing errors and to make a slight change or addition, if *strictly necessary*.)
4. Have you enclosed inked original drawings, or *(preferably not)* glossy prints of every figure, ready for direct reproduction? Are all details, especially the lettering and numbering, sufficiently large to show up clearly in the reduced size of the printed figure? (The consequence of making the slightest changes in the figures of the galley proof is that in most cases *new blocks* must be made.) Your figure material will be returned to you after publication of the article.
5. Is there a *separate* list of the figure captions? (All figures should have captions.)
6. Is the list of references complete, in accordance with the convention of the journal and are all author's initials given in all references?

Objective and descriptive material on endeavours and product developments from the industry for the section "Spotlight on Industry" should be sent directly to the publishers, North-Holland Publishing Company, P. O. Box 103, Amsterdam.

Nuclear Instruments and Methods is published fortnightly. The subscription price of a volume of 360 pages is $ 20.00 (168s.), postage free.

Subscriptions should be sent to the publishers, North-Holland Publishing Company, P. O. Box 103, Amsterdam, or to any subscription-agent.

Claims for missing numbers should be made within two months, following the date of publication. The publishers expect to supply missing numbers free only when losses have been sustained in transit and when the reserve stock will permit.

INFORMATION FOR ADVERTISERS

Advertising orders and enquiries can be sent to the Advertising Manager, North-Holland Publishing Company, P. O. Box 103, Amsterdam.

U.S. clients are invited to send their space orders, plates, lay-outs, enquiries etc. to: Trade Media International, 424, Madison Avenue, New York, N.Y. 10017, or through their own advertising agency.

French clients are requested to contact Régie Publicité Industrielle, 36 Rue du Fer-à-Moulin, Paris (5e), Tel. 707-53-39.

© No part of this issue may be reproduced in any form, by print, photoprint, microfilm or any other means without written permission from the publisher.

Published fortnightly — 2nd class postage paid at Jamaica, N.Y. — Printed in the Netherlands

SUBJECT INDEX

Accelerators and Reactors

Klystron bunching of the ion beam of a 5.5 MV Van de Graaff, J. H. Anderson, R. Batchelor, F. A. Howe, G. James and J. H. Towle 41 (1966) 30
Methoden für die Entwicklung von Zyklotron-Beschleunigungssystemen, H. Kannowade 41 (1966) 208
Source of polarized ions for a tandem accelerator, W. Gruebler, P. Schwandt, T. J. Yule and W. Haeberli . . . 41 (1966) 245
Suppression of multipacting in particle accelerators, A. J. Hatch 41 (1966) 261
Two graphical constructions for beam transport problems, T. C. Randle 41 (1966) 319
A method for integration of particle trajectories in an experimentally determined magnetic field, B. Olsen, G. Petterson and W. Schneider 41 (1966) 325
The measurement of radiation absorbed by particle accelerator structural components, C. E. Chapman and R. Sheldon 42 (1966) 141
Electronic ripple filter for the Brookhaven Alternating Gradient Synchrotron, H. J. Halama and R. L. Cassel . . 42 (1966) 157
Improvement in stability of the power supply system for the magnets of the Cambridge electron accelerator, G. V. Pallottino 42 (1966) 163
Comparison of ion source performance on a pulsed tandem Van de Graaff, L. E. Collins, D. Dandy and P. T. Stroud 42 (1966) 206
Amélioration de la conductivité superficielle du cuivre et de l'aluminium en hyperfréquences, par abaissement de température, F. Biquard et A. Septier 44 (1966) 18
Use of the $\frac{3}{2}$-radial resonance in extraction from a six-sector isochronous cyclotron, D. I. Hopp and J. R. Richardson 44 (1966) 277
Properties of an infinite focussing channel with successive quadrupole rotations not equal to 90°, H. O. Funsten 44 (1966) 301
Transformation of the proton source of an U-120 cyclotron for negative hydrogen ion production, Gr. Indreas and Th. Tauth 44 (1966) 353
Beam optics computation for particle transport systems by means of an improved Newton-Raphson method, M. Bassetti, R. M. Buonanni and M. Placidi 45 (1966) 93
Untersuchungen für ein FFAG-Elektronensynchrotron vom Radialsektortyp (Endenergie um 150 MeV), I. Allgemeine Übersicht und theoretische Grundlagen, W. Heinz 45 (1966) 102
Investigations of iris-loaded deflectors, H. Hahn and H. J. Halama 45 (1966) 141
Untersuchungen für ein FFAG-Elektronensynchrotron vom Radialsektortyp (Endenergie um 150 MeV), II. Numerisches Studium der Teilchenbewegung und Überlegungen zur Parameterauswahl, W. Heinz 45 (1966) 197
A study on some models of neutron thermopiles, R. Cervellati, R. Gislon and B. Rispoli 45 (1966) 221
Steady-state acceleration of particles in the presence of space charge, A. N. Lebedev and E. A. Zhilkov 45 (1966) 238
Généralisation aux distributions magnétiques de révolution d'une méthode de correction des formes polaires destinées à engendrer une topographie de gradient pré-déterminé, G. Lucenet et J. Lafoucrière 45 (1966) 250
Untersuchungen für ein FFAG-Elektronensynchrotron vom Radialsektortyp (Endenergie um 150 MeV), III. Injektion, W. Heinz 46 (1967) 16
Determining the index of a betatron field from the vector potential, L. Šípek 46 (1967) 27
Axially symmetric magnetic fields: An investigation about conically shaped pole faces, a general method to evaluate the scalar potential, G. Bosi 46 (1967) 55
A new type of neutron chopper for measurements with very slow neutrons, E. Tunkelo and A. Palmgren 46 (1967) 70
Magnetic center location in multipole fields, J. K. Cobb and J. J. Muray 46 (1967) 99
Electrode system of improved stress uniformity for pressurized Van de Graaff generators, A. Kiss, E. Koltay and A. Szalay 46 (1967) 130
The energy calibration of neutron velocity spectrometers, S. A. R. Wynchank 46 (1967) 141
A theoretical investigation of the stepped-field configuration used for focussing positron beams, D. E. Lobb . . . 46 (1967) 181
The cold neutron facility at the FiR 1, E. Tunkelo and A. Palmgren 46 (1967) 266
Equilibrium charge distributions of 8 MeV carbon ions in various media, E. Prefkschat and R. Vandenbosch . . 46 (1967) 333
High current pulsed electron source – Van de Graaff, W. J. Ramler, K. Johnson and T. Klippert 47 (1967) 23
An improved non-intercepting accelerator beam position sensor, L. Dorikens-Vanpraet, K. van Camp, M. Dorikens and D. Callebaut 47 (1967) 58
Eine Spannungs- und Stromregelung für einen 1 MV-Bandgenerator, J. Jakschik 47 (1967) 265
A phase stabilized beam pulsing system, E. Adelberger 47 (1967) 327
Probability distribution of the equilibrium orbit displacement in an AG synchrotron due to random errors in magnet locations, M. L. Thiebaux, Jr. 48 (1967) 61
Removal of nonlinear effects in deflecting magnets, I. B. Issinsky, V. I. Kotov, E. M. Kulakova, K. P. Myznikov and L. A. Smirnova 48 (1967) 147
Untersuchungen für ein FFAG-Elektronensynchrotron vom Radialsektortyp (Endenergie um 150 MeV), IV. Zur Wahl optimaler Kenngrößen und Hochfrequenzprogramme für das HF-Beschleunigungssystem, W. Rudloff 48 (1967) 197

Untersuchungen für ein FFAG-Elektronensynchrotron vom Radialsektortyp (Endenergie um 150 MeV), V. Aufbau und Eigenschaften des Hochfrequenzbeschleunigungssystems, W. Rudloff 48 (1967) 21
A wide range voltage stabilizer for a Van de Graaff accelerator. H. Brafman, G. Goldring and D. Tamari . . . 48 (1967) 30
The build-up of radial oscillations induced by first harmonic field errors in a cyclotron, J. D. Lawson 49 (1967) 11
A simple ion beam scanner, J. W. Jagger, J. G. Page and P. J. Riley 49 (1967) 12
The fringing field of round magnet poles, G. Bosi 49 (1967) 19
An electrostatic particle guide for high resolution charged particle spectrometry in intense reactor fluxes, N. S. Oakey and R. D. Macfarlane 49 (1967) 22
Effective resolving time in coincidence measurements on the cyclotron beam, A. Z. Hrynkiewicz, S. Kopta, S. Szymczyk and T. Walczak 49 (1967) 22
A beam centering device for nuclear accelerators, H. Fauska and C. F. Williamson 50 (1967) 9
An analogue system displaying beam optics, R. F. Rumphorst, M. A. A. Sonnemans, H. Arnold and L. A. Ch. Koerts 50 (1967) 15
Elimination of beam-defocusing effects due to filament magnetic fields in the electron gun of a Linac, Y. Narita, H. Yamazaki and Y. Ozawa 50 (1967) 16
Microanalysis of fluorine in zircaloy by the use of the $^{19}F(p,\alpha\gamma)^{16}O$ reaction, E. Möller and N. Starfelt 50 (1967) 21
Amélioration du rendement d'une source d'ions du type haute fréquence et sa pulsation. A. Hansart, M. A. Landercy, A. Noblet et G. Sylin 50 (1967) 24

Nuclear Spectroscopy Instrumentation

Semiconductor detectors for nuclear spectrometry, I, F. S. Goulding 43 (1966)
Semiconductor detectors for nuclear spectrometry, II, J. W. Mayer 43 (1966)
The impact of semiconductor detectors on gamma-ray and electron spectroscopy, J. M. Hollander 43 (1966)
Recent developments in scintillation detectors, D. Aliaga-Kelly and D. R. Nicoll 43 (1966) 1
Why should we investigate nuclides far off the stability line, I. Bergström 43 (1966) 1
How should we investigate nuclides far off the stability line, I. Bergström 43 (1966) 1
Why nuclear spectroscopists should know about the recent development in the field of atomic stopping, I. Bergström and B. Domeij 43 (1966) 1
A scheme for high luminosity, high resolution internal and external conversion measurements, K.-E. Bergkvist . 43 (1966) 1
Improved beta-spectrometers, G. E. Lee-Whiting 43 (1966) 1
Proposed electrostatic correction of the Chalk River $\pi\sqrt{2}$ beta-spectrometer, G. E. Lee-Whiting 43 (1966) 1
Recoil measurements of subnanosecond nuclear lifetimes, T. Novakov 43 (1966) 1
Computer techniques for the analysis of gamma-ray spectra obtained with NaI and lithium-ion drifted germanium detectors, R. L. Heath 43 (1966) 2
Review of basic instruments and trends, H. Guillon 43 (1966) 2
Review of multichannel and multiparameter analyser systems, H. Guillon 43 (1966) 2
Review of theories and experiments of resolving time with scintillation counters, E. Gatti and V. Svelto 43 (1966) 2

Counters, Chambers and Detectors

Photo digit: Photoelectric digitalized method for spark chamber data extraction, G. Diambrini and I. Giannini . . 41 (1966)
The sensitive time of a wide gap spark chamber, B. Eisenstein, D. Grossman, R. Sah and K. Strauch 41 (1966)
Use of a nitrogen polarimeter as a polarized proton detector, J. D. Steben and M. K. Brussel 41 (1966)
A 24 position target chamber for observation of β and γ rays, B. Jensen and J. W. Nelson 41 (1966)
Some remarks on the properties of small organic scintillators as detectors of fast neutrons, S. Schwarz and H. O. Zetterström 41 (1966)
A current spark chamber used as a several hundred channel ladder counter, J. Jeanjean, J. Lefrançois and J. Perez-y-Jorba 41 (1966) 1
A counter telescope system for charged photoparticles, P. J. Scanlon and H. Janzen 41 (1966) 1
Use of a position sensitive surface barrier particle detector for kinematic compensation in heavy ion reactors, C. Broude and R. W. Ollerhead 41 (1966) 1
An array of position sensitive surface barrier detectors for use in a broad range magnetic spectrograph, R. Bock, H. H. Duhm, W. Melzer, F. Pühlhofer and B. Stadler 41 (1966) 1
Le comportement sous irradiation gamma de chambres d'ionisation cylindriques remplies d'hexane liquide, D. Blanc, J. Mathieu, J. P. Patau, H. François et G. Soudain 41 (1966) 2
An electron scintillation detector with good energy resolution, P. Sparrman, J. Lindskog and A. Marelius . . . 41 (1966) 2
Operational characteristics of a wide gap spark chamber, L. P. Keller, R. A. Schluter and T. O. White 41 (1966) 3
The effect of deadtime on counting errors, C. E. Cohn 41 (1966) 3
Low background counting of betas and alphas with silicon detectors, F. J. Walter and R. R. Boshart 42 (1966)
Application of gamma ray spectrometry and computer techniques to the determination of the minimum detectable content of trace elements in neutron activated materials, J. Pauly, G. Guzzi, F. Girardi and A. Borella . . 42 (1966)
Light attenuation in scintillation counters, P. Kuyper, C. J. Tiesinga and C. C. Jonker 42 (1966)

A projector for large-size bubble chamber pictures, J. Heughebaert, J. Debaisieux and F. Grard. 42 (1966) 87
Chambre de réactions à détecteurs à semi-conducteurs adaptée à des mesures de corrélations de particules, J. Hossenlopp, A. Haberer et R. Bilwes 42 (1966) 137
L'efficacité de détection des chambres à étincelles et son calcul précis, J. Maurel, P. Segur, J. P. Trapp et D. Blanc 42 (1966) 173
A scattering chamber for use with cooled large area lithium-compensated silicon radiation detectors, W. R. Dodge, J. A. Coleman and S. R. Domen 42 (1966) 181
Comparison of leading-edge and crossover timing in coincidence measurements, R. E. Bell 42 (1966) 211
The lower limit of detection for short-lived radioisotopes, S. Sterliński 42 (1966) 219
Special ionization chambers for absolute measurement of high energy bremsstrahlung intensity, A. P. Komar, S. P. Kruglov and I. V. Lopatin 42 (1966) 235
Bernoulli trials and counting correlations in nuclear particles detection, N. Pacilio 42 (1966) 241
Chambre à diffusion à cible gazeuse de faible volume à système de pompage différentiel, G. Gobert, G. S. Mani et A. Sadeghi 42 (1966) 250
Solid-state devices as detectors of coherent high-energy interactions, R. L. Lander, W. A. W. Mehlhop, H. J. Lubatti and G. L. Schnurmacher 42 (1966) 261
Measurement and analysis of spark chamber tracks with a vidicon scanning system, J. G. McEwen and A. Seidman 42 (1966) 273
The accurate measurement of the relative efficiency of Ge(Li) gamma-ray detectors in the energy range 500 to 1500 keV, J. M. Freeman and J. G. Jenkin 43 (1966) 269
A wedge-shaped scintillation detector for a magnetic spectrometer, M. Calderbank, E. J. Burge and V. R. W. Edwards 43 (1966) 317
Diamond as a neutron scintillation counter, T. G. Miller 43 (1966) 338
Imagerie X et γ au moyen d'un amplificateur d'image à gaz fonctionnant soit en régime d'étincelle soit en régime d'avalanche, A. Lansiart, J. P. Morucci, G. Roux et J. Leloup 44 (1966) 45
The reverse current of high-resistivity silicon surface-barrier counters, H. J. Langmann and O. Meyer 44 (1966) 55
Factors influencing the developing of the discharge along the trajectory of a particle in a spark chamber, V. N. Bolotov, M. I. Devishev and L. F. Klimanova 44 (1966) 77
Determination of relative efficiencies for a multidetector system, H. L. Crannell and L. R. Suelzle 44 (1966) 133
Calculated gamma ray response characteristics of semiconductor detectors, K. M. Wainio and G. F. Knoll . . . 44 (1966) 213
Temps de collection des charges dans les détecteurs de rayonnements nucléaires à base de silicium compensé au lithium, J.M. Kuchly, P. Siffert et A. Coche 44 (1966) 239
Inefficient charge collection in silicon surface barrier detectors, P. Eisler 44 (1966) 253
Dead time and fatigue in self-quenching G.M. counters at different temperatures, A. Peeva and D. Guéva . . . 44 (1966) 314
Geometrical reconstruction of high energy interactions in spark chamber magnet arrangements, D. E. C. Fries . . 44 (1966) 317
Observation of X-rays from spark discharges in a spark chamber, S. Frankel, V. Highland, T. Sloan, O. Van Dyck and W. Wales 44 (1966) 345
Sur un ensemble de chambres soniques, G. Bizard, J. Duchon, G. Landaud, F. Le-Meilleur, J. P. Patry, M. Schérer, J. Seguinot et J. Yonnet 45 (1966) 119
Etude simultanée des réactions (d,t), (d,^{3}He) et (d,α) à l'aide d'un télescope à 3 détecteurs, R. Bouche, L. Feuvrais, M. Gaillard, P. Gaillard, M. Gouanere, M. Gusakov, J. R. Pizzi, A Sarazin et J.-L. Vidal 45 (1966) 133
A spherical dose equivalent neutron detector, J. W. Leake 45 (1966) 151
Determination of bubble density, R. L. Gluckstern 45 (1966) 166
Determination of the quality factor through the utilization of a balanced, tissue equivalent, ionization chamber, C. H. Distenfeld and A. M. Markoe 45 (1966) 181
A large area fission fragment detector with fast response, K. H. Böckhoff, E. Migneco, J. Theobald and J. Wartena 45 (1966) 233
Accurately defined neutron beams from D(d,n)^{3}He at $E_d = 50$ keV, using the associated particle method, L. F. C. Monier, G. E. Tripard and B. L. White 45 (1966) 282
Optimum design of thin large area scintillation counters, D. G. Crabb, A. J. Dean, J. G. McEwen and R. J. Ott 45 (1966) 301
Pulse shape distributions from gamma-rays in lithium drifted germanium detectors, M. G. Strauss, R. N. Larsen and L. L. Sifter 46 (1967) 45
A study of wide gap spark chambers, S. H. Aronson, R. C. Catura, H. H. Chen and K. W. Chen 46 (1967) 93
Ein neuartiger Detektor für langsame Neutronen, H. Rauch, F. Grass und B. Feigl 46 (1967) 153
Design and performance of wire spark chambers and magnetostrictive delay line readout system, V. Perez-Mendez, Th. J. Devlin, J. Solomon and Th. F. Droege 46 (1967) 197
Performance of wire spark chambers with large area and two coordinate read-out, S. Galster, J. Görres, G. Hartwig, H. Klein, J. Moritz, W. Schmidt-Parzefall and H. Schopper 46 (1967) 208
Calculation of angular correlation attenuation factors and efficiencies for lithium drifted germanium detectors, J. L. Black and W. Gruhle 46 (1967) 213
Localisation de particules sur la focale d'un analyseur magnétique par chambre à étincelles, J. Saudinos, G. Vallois et C. Laspalles 46 (1967) 229
Beam profile spark chamber with magnetostrictive readout, H. Weisberg and V. Perez-Mendez 46 (1967) 233
Generation-recombination noise and its influence on the energy resolution of diffused silicon p-n junction radiation detectors, R. Y. Deshpande 46 (1967) 255
Detection efficiency of a plastic scintillator for neutrons between 0.2 and 3 MeV, R. Honecker and H. Grässler 46 (1967) 282

Photopeak and double-escape peak efficiencies of germanium lithium drift detectors, N. V. DE CASTRO FARIA and R. J. A. LÉVESQUE 46 (1967) 32
A miniature cooling system for Ge(Li) solid-state detectors, C. F. WILLIAMSON and J. ALSTER 46 (1967) 34
Finite solid angle corrections to angular correlations for square Ge(Li) gamma detectors, R. AVIDA, U. ATZMONY and I. UNNA 46 (1967) 35
Fast pulse pickoff with semiconductor radiation detectors, A. ALBERIGI QUARANTA, M. MARTINI and G. OTTAVIANI 47 (1967) 1
Taux de comptage d'un télescope cosmique composé de deux disques circulaires, DJ. HERISTCHI 47 (1967)
Décroissance de l'intensité lumineuse des scintillateurs organiques, H. DUPONT, G. PFEFFER, G. LAUSTRIAT et A. COCHE 47 (1967)
Fabrication of germanium Li drifted detectors, F. CAPPELLANI, W. FUMAGALLI, M. HENUSET and G. RESTELLI . . 47 (1967) 12
A scattering chamber using semiconductor detectors, M. A. HAQUE, O. H. HOLZER, A. HOSSAIN, A. SABIR and A. K. M. SIDDIQ 47 (1967) 1
Mobilité des électrons et des trous à 77°K dans le germanium compensé au lithium, J. M. KUCHLY, L. STAB, R. HENCK, P. SIFFERT et A. COCHE 47 (1967) 1
Propagation of pulses in magnetostriction spark chambers, G. GIANNELLI, B. MARANGELLI and M. RICCO 47 (1967) 1
Delayed coincidence line shapes from a scintillation detector with wide dynamic range, H. W. LEFEVRE and J. L. BINNEY 47 (1967) 2
Digitized wide-gap wire spark chamber, G. E. CHIKOVANI, G. C. LAVERRIÈRE and P. SCHÜBELIN 47 (1967) 2
A trigger-circuit for beta-ray spectrometers with semiconductor detectors in stack-assemblies, O. C. ALLKOFER, J. M. FOX and C. GRUPEN 47 (1967) 3
Ionization fluctuations and resolution of ionization chambers and semiconductor detectors, G. D. ALKHAZOV, A. P. KOMAR and A. A. VOROB'EV 48 (1967)
Semiconductor detector as a fast neutron spectrometer, R. G. MILLER and R. W. KAVANAGH 48 (1967)
High temperature behaviour and long-term stability of lithium drifted silicon surface-barrier detectors, A. J. TUZZOLINO, M. A. PERKINS and J. KRISTOFF 48 (1967)
A burst can detection system utilizing combined fission gas monitoring and electrostatic precipitation, O. STRINDEHAG 48 (1967)
Proportional counter with large thin windows for low energy α particles, J. BENN, H. H. MÜLLER, H. H. STAUB and H. WINKLER 48 (1967)
Compteur Čerenkov à grande surface de détection, J. BANAIGS, J. BERGER, L. GOLDZAHL et B. MOUËLLIC 48 (1967)
Computer track matching in bubble chambers, C. GROSSO, G. RINAUDO and A. E. WERBROUCK 48 (1967)
Detection efficiency of plastic scintillation counters for neutrons in the energy range 20–130 MeV, D. G. CRABB, J. G. MCEWEN, E. G. AULD and A. LANGSFORD 48 (1967)
Determination of fission fragment energies using solid-state detectors, V. FORGUE and S. KAHN 48 (1967)
Trapping in defect states as a source of the pulse height defect in silicon surface barrier detectors, P. L. EISLER . . 48 (1967) 1
Elektroneneinfang in BF_3-Proportionalzählrohren, H. FRÖHLICH und H. F. BRINCKMANN 48 (1967) 2
Digitizer for spark chamber photographs, I. NADELHAFT, R. W. FINDLEY and R. A. CARRIGAN, JR. 48 (1967) 2
Use of a differential ionization chamber in the study of long half-lives, D. A. WALKER and H. T. EASTERDAY . . . 48 (1967) 2
Optimum distribution of counter time, A. S. GOLDIN 48 (1967) 3
Leakage current and noises in surface barrier particle detectors, M. MASUDA, S. TAKEDA and H. CHISAKA 49 (1967)
A high-energy gamma-ray detector with angular and spectral resolution, D. SADEH and J. KANE 49 (1967) 1
Knothole, a new side-well gamma ray detector, R. D. LLOYD, C. W. MAYS and D. R. ATHERTON 49 (1967) 1
Fabrication of surface-barrier nuclear particle detectors from p-type silicon, P. J. MATHEW, N. G. CHAPMAN and G. E. COOTE 49 (1967) 2
A digitized bubble counting microscope, J. SIMMONS 49 (1967) 2
Accelerator radiation monitoring and dosimetry with integrating pulse discharge ionization chamber detectors, C. DISTENFELD, W. BISHOP and J. LAMPLOUGH 49 (1967) 3
Carrier multiplication in semiconductor detectors, I. OGAWA 49 (1967) 3
Distribution volumique des photons créés dans un scintillateur liquide par différents rayonnements, E. ROSENSTINGL, L. COMMANAY, A. GODEAU, D. BLANC et J. L. TEYSSIER 49 (1967) 3
The angular dependence of the sensitivity of GM counters, P. POLLY 49 (1967) 3
The all-glass spark chamber, Š. ŠARO, P. POVINEC and V. SRKALOVÁ 50 (1967)
Influence of the entrance window on the energy resolution of surface barrier semiconductor detectors, G. FABRI, J. KÁROLYI and V. SVELTO 50 (1967)
Method for detecting muons stopping in the gas of an isotropic discharge chamber, V.I. KOMAROV, O. V. SAVCHENKO and N. S. FEDYAEV 50 (1967) 1
Construction and operation of thin parallel plate proportional counters, R. H. HILBERG, J. E. DRAPER and W. J. ALSTON 50 (1967) 1
Effect of pulsed X-rays on a BF_3 counter, K. FUKUDA, S. OKABE and Y. SATO 50 (1967) 1
Precision measurement of thermal neutron beam densities using a ^3He proportional counter, J. ALS-NIELSEN, A. BAHNSEN and W. K. BROWN 50 (1967) 1
Corrections in the gold foil activation method for determination of neutron beam density, J. ALS-NIELSEN 50 (1967) 1
A method for the evaluation of the dose-sensitivity of GM counters as function of the energy, P. POLLY 50 (1967) 1
A counter-ratio system for detecting high energy neutron thresholds, R. M. BRUGGER and J. H. MONTAGUE . . . 50 (1967) 2

A threshold gas Cherenkov counter with large solid angle, J. MacG.Dobbs, W. K. McFarlane and D. Yount . . **50** (1967) 237
A regrown p^+ contact for lithium-drifted germanium gamma-ray detectors, J. B. Mooney **50** (1967) 242
A new detector for neutron capture cross section measurements, H. Weigmann, G. Carraro and K. H. Böckhoff **50** (1967) 265
Curves for the response of a Ge(Li) detector to gamma rays in the energy range up to 11 MeV, J. Kopecký, W. Ratyński and E. Warming **50** (1967) 333

Instruments and Methods for High-Energy Physics

Estimates of residual radiation levels induced by hig-energy nucleons, K. S. Toth, C. B. Fulmer and M. Barbier **42** (1966) 128
Superconducting focusing systems in high energy physics, P. F. Smith and G. P. Haskell **43** (1966) 285
Design and performance of an on-line wire spark chamber spectrometer for 5 to 30 GeV/*c* particles, E. Bleser, G. B. Collins, J. Fischer, T. Fujii, S. Heller, W. Higinbotham, J. Menes, H. Pate, F. Turkot and N. C. Hien **44** (1966) 1
Some applications of semiconductor counters in high energy physics, Yu. K. Akimov **45** (1966) 173
Performance of a large magnet spark chamber, P. Astbury, G. Finocchiaro, A. Michelini, D. Websdale, C. H. West, W. Beusch, B. Gobbi, M. Pepin, E. Polgar and M. A. Pouchon **46** (1967) 61
Test of a spectrometer for intense nanosecond bursts of high-energy particles, G. Plass, K. M. Vahlbruch and H. W. Wachsmuth **46** (1967) 223
Airborne radioactivity produced at high-energy accelerators, A. Rindi and S. Charalambus **47** (1967) 227
An analysis of the performance of automated, high resolution magnetic hodoscopes, D. F. Bacon and W. F. Nash **47** (1967) 353
Improved Monte Carlo calculation of the nucleon-meson cascade in shielding material, I. Description of the method of calculation, J. Ranft **48** (1967) 133
The response of a liquid ionization chamber to gamma radiation and to high-energy neutrons and protons, S. Charalambus **48** (1967) 181
Improved Monte Carlo calculation of the nucleon-meson cascade in shielding material, II. Comparison of the results for incident proton beams with momenta of 10 and 20 GeV/*c* with experimental data, J. Ranft **48** (1967) 261
A charged particle telescope for use in the measurement of the cosmic ray electron spectrum in the energy range 10 MeV–2 GeV, W. Webber and Ch. Chotkowski **49** (1967) 45
A gated pulse charge analyser for high-energy beam profile and flux measurements, I. Lehraus and R. Matthewson **49** (1967) 93
Une cible de protons polarisés pour la physique des hautes énergies, I. Production de la polarisation, M. Borghini, P. Roubeau et C. Ryter **49** (1967) 248
Une cible de protons polarisés pour la physique des hautes énergies, II. Mesure de la polarisation, M. Borghini, P. Roubeau et C. Ryter **49** (1967) 259
Un *Q*-mètre adapté à la mesure de polarisations nucléaires élevées, C. Ryter **49** (1967) 267
Sensitivity of cosmic gamma-ray telescopes, B. R. Dennis and G. H. Share **50** (1967) 100

Instruments and Methods for Nuclear Spectroscopy

Analysis of two-dimensional coincidence spectra, D. D. Slavinskas, T. J. Kennett, W. V. Prestwich and G. L. Keech **41** (1966) 1
Spectres d'impulsions à "un photoélectron", II. Méthodes de mesures de faibles flux lumineux et sélection des photomultiplicateurs, M. Duquesne, I. Tatischeff et N. Recouvreur **41** (1966) 13
A Ge(Li) gamma spectrometer employing an anti-Compton mantle of NaI(Tl), J. Kantele and P. Suominen . . . **41** (1966) 41
Backscattering of 1-MeV electrons from silicon, D. H. Rester and W. J. Rainwater, Jr. **41** (1966) 51
Distribution angulaire d'une source de neutrons D(d,n)^{3}He en cible épaisse pour deutons de 100 keV, V. Naggiar, L. Lafaye et P. Breonce **41** (1966) 77
A broad-range high-transmission electron spectrometer, G. A. Burginyon and J. S. Greenberg **41** (1966) 109
Finite geometry correction for differential scattering cross section experiments, H. Willmes **41** (1966) 122
Ring-focus in long solenoid beta-ray spectrometer, equipped with an axial magnetic dipole as divergent lens, C. Muscia **41** (1966) 125
On reconstruction of continuous gamma-ray spectra, Yung Sung Su and Tsu-Chih Wu **41** (1966) 129
Calculation of Mössbauer absorption areas for thick absorbers. D. W. Hafemeister and E. Brooks Shera **41** (1966) 133
The automatic following microscope, J. Cox, M. J. B. Duff and L. J. Townsend **41** (1966) 195
Heavy ion reaction product identification by measurement of dE/dx and E. M. W. Sachs, C. Chasman and D. A. Bromley **41** (1966) 213
A method for time-energy measurements, L. Papadopoulos **41** (1966) 241
Using the ^{28}Si(n,q) interaction in fast neutron spectroscopy, J. A. Shannon and J. B. Trice **41** (1966) 255
Extraction of ions from a mercury arc plasma, C. Munakata **41** (1966) 293
Tracing of relativistic electrons in electrical fields by a numerical method, P. Sparrman **41** (1966) 305
The focusing properties of long magnetic lenses, III, I. Lindgren, B. Olsen, G. Petterson and W. Schneider . . **41** (1966) 331
Response corrections in digitized statistical spectra, D. D. Slavinskas, T. J. Kennett and W. V. Prestwich . . . **41** (1966) 341
Au sujet des défauts de symétrie dans les mesures de polarisation, I. Discussion générale des méthodes de mesure usuelles de la polarisation, J. Libert **41** (1966) 348
Loss of charged particles by nuclear interactions in scintillators, D. F. Measday and R. J. Schneider **42** (1966) 26

A programmed automatic control system for a triple axis neutron spectrometer, S. Bevilacqua, E. de Agostino, B. Rispoli and D. Cribier 42 (1966)
Nouvelle technique de mesure des paires de matérialisation dans les émulsions photographiques, P. Y. Bertin, J. Castor, J. Augerat, J. Gardès, L. Avan et D. B. Isabelle 42 (1966)
Zur Spektrometrie weicher Röntgenstrahlung in Proportionalzählern. I. Berechnung zum energetischen Auflösungsvermögen eines Proportionalzählrohres, I. Siewert und H. Schmidt 42 (1966)
Zur Spektrometrie weicher Röntgenstrahlung in Proportionalzählern. II. Ein wandloses Proportionalzählrohr mit Antikoinzidenzring zur Spektrometrie weicher Röntgenstrahlung, H. Schmidt, I. Siewert und H. Schäfer 42 (1966)
A routine procedure for 4π proportional counting soft beta particles from solid sources, R. L. G. Keith and D. E. Watt 42 (1966)
More on the spherical condenser as an analyser, I. Nonrelativistic part, H. Z. Sar-El 42 (1966)
Intensity and resolution in the time-of-flight method for neutron diffraction, L. H. Schwartz 42 (1966)
Mineral exploration and soil analysis using in situ neutron activation, F. E. Senftle and A. F. Hoyte 42 (1966)
Time resolution measurements with XP 1020 photomultipliers, G. Bertolini, V. Mandl, A Rota and M. Cocchi 42 (1966)
Total and photopeak efficiencies for a well type NaI(Tl) crystal for cylindrical sources, P. N. Tiwari and E. Kondaiah 42 (1966)
Monte Carlo calculations for a gamma ray telescope, A. Avni and D. Sadeh 42 (1966)
Evaluation of peaks in nuclear spectroscopy, L. Daddi and V. D'Angelo 42 (1966)
Resolution of ^{89}Sr and ^{90}Sr in environmental media by an instrumental technique, R. J. Velten 42 (1966)
Entfaltung kontinuierlicher γ-Impulshöhenverteilungen, W. Kreische, W. Lampert und G. Loos 42 (1966)
A filter difference method for measuring inelastic scattering of slow neutrons, S. S. Pan, F. J. Webb and M. L. Yeater 42 (1966)
Gamma photon tracker feasibility experiments, E. Malowicki and D. I. Zulch 42 (1966)
A constant accelerator fly-back Mössbauer spectrometer, H. Brafman, M. Greenshpan and R. H. Herber . . . 42 (1966)
Low energy ^{3}He activation analyses for carbon and oxygen, S. Gorodetzky, A. Pape, A. Chevallier, J. C. Sens and R. Armbruster 42 (1966)
Multiple scattering of fast neutrons in ^{6}Li-glass scintillators, H.-O. Zetterström, S. Schwarz and L. G. Strömberg 42 (1966)
Target angle optimization for minimum energy spread, J. L. Need 42 (1966)
Scattering and energy loss of electrons in silicon near the radiation damage threshold, G. G. George and P. R. C. Stevens 43 (1966)
Fast neutron spectroscopy using the Yale electron linac and a new nanosecond time-of-flight system, F. W. K. Firk 43 (1966)
Features of a plasma ion source with a hot cathode gas discharge, M. Ciampi and N. Talini 43 (1966)
Mössbauer effect velocity drive linearized by shape correction, R. Zane 43 (1966)
La distribution des énergies d'ions He produits par une source à excitation électrique de haute fréquence, P. Benoit-Cattin, D. Blanc, A. Bordenave-Montesquieu, R. Dagnac et S. Vacquié 43 (1966)
A method for the analysis of pulse height spectra, H. D. Graber and D. D. Watson 43 (1966)
Numerical analysis of the time spectrum of delayed coincidences, I., L. Boström, B. Olsen, W. Schneider and E. Matthias 44 (1966)
Numerical analysis of the time spectrum of delayed coincidences, II., B. Olsen and L. Boström 44 (1966)
A continuous monitor for radioactive fallout in the air, S. P. Thukral and K. G. Vohra 44 (1966)
Amélioration du rapport signal sur bruit par accumulation de données. Application à la résonance magnétique nucléaire, D. Gagnaire, V. Spivak, F. Sicard et P. Magneron 44 (1966)
A charged particle identification system using a fast multiplier, S. K. Mark and R. B. Moore 44 (1966)
A broad-range magnetic spectrograph system for routine angular distribution determinations, E. Feldl, C. Fetrow and C. F. Moore 44 (1966)
Mössbauer recoilless fraction in tin compounds, H. A. Stöckler and H. Sano 44 (1966)
Peak-to-total ratios and efficiencies for a 5 in. dia. by 5 in. NaI crystal, F. C. Young, H. T. Heaton, G. W. Phillips, P. D. Forsyth and J. B. Marion 44 (1966)
A circuit for preventing accumulation of experimental data when the nuclear reaction rate exceeds a preset value, S. K. Gupta, K. V. K. Iyengar and P. J. Bhalerao. 44 (1966)
A $b = 1.0$ toroïdal beta ray spectrometer, F. J. Bartis 44 (1966)
Neutron powder diffractometry using a wavelength of 2.6 Å, B. O. Loopstra 44 (1966)
Au sujet des défauts de symétrie dans les mesures de polarisation, II. Influence des défauts de symétrie instrumentaux dans le cas des méthodes de mesure usuelles de la polarisation, J. Libert 44 (1966)
Au sujet des défauts de symétrie dans les mesures de polarisation, III. Discussion de l'influence des défauts de symétrie instrumentaux dans le cas des méthodes de mesure usuelles de la polarisation, J. Libert 44 (1966)
Multiple scattering of fast neutrons in ^{10}B-glass scintillators, H.-O. Zetterström, L. G. Strömberg and S. Schwarz 44 (1966)
The measurement and analysis of high energy gamma-ray spectra, R. R. Whitehead, G. G. Shute and A. W. Parker 44 (1966)
The relationships between light output and energy resolution in thallium activated sodium iodide crystals, R. Hill and A. J. L. Collinson 44 (1966)
Charge determination by thin-down track width measurements, Y. K. Lim and K. Fukui 44 (1966)
Mössbauer spectrometer calibration using ^{57}Fe enriched metallic iron, H. Shechter, M. Ron, S. Niedzwiedz and R. H. Herber 44 (1966)
Zur Bestimmung von Absolutaktivitäten von β-Strahlern aus Lösung mit dem Geiger-Müller-Zählrohr, F. Hoyer 44 (1966)
A spectrometer for 14 MeV neutron capture spectroscopy, F. Cvelbar, A. Hudoklin, M. V. Mihailović, M. Najžer and V. Ramšak 44 (1966)

Photomultiplier resolving time measurements utilising a light pulse generator, D. Porter, J. McDonald and D. T. Stewart . . . 44 (1966) 309
A self-contained system for stabilizing scintillation and semiconductor spectrometers, A. Pakkanen and F. Stenman . . . 44 (1966) 321
Über eine Bestimmung der Peaklage von reinen und komplexen Photopeaks, H. Mundschenk . . . 44 (1966) 325
Maniac: A computer code for correcting neutron scattering angular distributions, P. R. Bevington and G. A. Petitt 44 (1966) 341
Determination of nuclide concentrations in solutions containing low levels of radioactivity by least-squares resolution of the gamma-ray spectra, E. Schonfeld, A. H. Kibbey and W. Davis, Jr. . . . 45 (1966) 1
Methods of determination of internal conversion coefficients, B. N. Subba Rao . . . 45 (1966) 22
The energy straggling of 1-MeV protons in gases, D. L. Mason, R. M. Prior and A. R. Quinton . . . 45 (1966) 41
Sur un spectromètre β à trajectoires trochoidales réalisé au moyen de bobines sans fer, D. Mugnier et J. Lafoucrière 45 (1966) 45
Über eine Methode zur Bestimmung der Intensität komplexer Photopeaks, H. Mundschenk . . . 45 (1966) 77
Efficiency calibration of 3×3-inch NaI(Tl) crystals, B. Chinaglia and R. Malvano . . . 45 (1966) 125
Behaviour of the threshold circuit at the input of analysis systems for scintillation pulses, N. Abbattista, M. Coli and V. L. Plantamura . . . 45 (1966) 157
Spectral information and the experimental resolution problem, J. T. Grissom, D. R. Koehler and B. G. Gibbs . . . 45 (1966) 190
Neutron diffraction by time-of-flight, J. M. A. Reichelt and A. L. Rodgers . . . 45 (1966) 245
Slow neutron chopper-monochromator with curved slits, Gy. Zsigmond, L. Bata and E. Kisdi-Koszó . . . 45 (1966) 255
Über eine Eichung eines 7.5×7.5 cm-NaJ(Tl)-Vollkristalls zur Absolutzählung flächenförmiger Präparate, H. Mundschenk . . . 45 (1966) 261
Gamma-ray spectral unfolding by the stepwise statistical method, M. H. Young and N. S. Singhal . . . 45 (1966) 287
On a system of magnetized cobalt mirrors used to produce an intense beam of polarized thermal neutrons, K. Abrahams, W. Ratynski, F. Stecher-Rasmussen and E. Warming . . . 45 (1966) 293
An on-line computer system in use with low-energy nuclear physics experiments, D. S. Gemmell . . . 46 (1967) 1
Proton recoil spectrometer for neutron spectra between 50 and 450 MeV, W. A. Gibson, W. R. Burrus, J. W. Wachter and C. F. Johnson . . . 46 (1967) 29
Production of negative lithium ions in a Penning discharge, H. Baumann, K. Bethge and E. Heinicke . . . 46 (1967) 43
A comparative study of response correction methods for linear ratemeters, D. H. Pilgrim and K. K. Watson . . . 46 (1967) 77
An automatic sample changer with a special changing method for γ- and γ-γ-active sources, K. H. Blank and H. Seufert . . . 46 (1967) 86
A slicing method for side-viewing nuclear phenomena in emulsions, K. Fukui . . . 46 (1967) 109
Statistically efficient use of reference pulses in spectrometer stabilization, R. A. Dudley . . . 46 (1967) 116
Light collection on a photocathode from a cylindrical scintillator, M. Cocchi and A. Rota . . . 46 (1967) 136
Correction of response distortion of non-linear ratemeters, K. K. Watson and D. H. Pilgrim . . . 46 (1967) 145
An equivalent circuit for the statistical behaviour of the scintillation counter, S. Donati, E. Gatti and V. Svelto . 46 (1967) 165
On-line computer controlled automatic sample changer for use with a total gamma absorption tank, R. R. Fullwood, B. L. Steadman and J. F. Lewis . . . 46 (1967) 194
Au sujet des défauts de symétrie dans les mesures de polarisation, IV Discussion générale des méthodes de mesure de la polarisation, utilisant un champ magnétique de précession, J. Libert . . . 46 (1967) 238
A stabilizing system for magnetic spectrometers based on the Hall-effect, W. Lourens and B. Visser . . . 46 (1967) 275
Particle identification by pulse-height correlation in a range telescope, D. E. Groom and J. H. Marshall . . . 46 (1967) 293
A note on the relationship between energy loss and light output for plastic scintillator NE-102, D. E. Groom and M. G. Hauser . . . 46 (1967) 301
A fast-neutron spectrometer for reactor environments, V. V. Verbinski and M. S. Bokhari . . . 46 (1967) 309
A high-resolution high-luminosity beta-ray spectrometer design employing azimuthally varying magnetic field, K.-E. Bergkvist and A. M. Sessler . . . 46 (1967) 317
Fast digital output of a multichannel analyzer, H. Dilcher, G. Hochweller and W. Zimmermann . . . 46 (1967) 344
Response to environment and radiation of an ionization chamber and matched Geiger tube used on spacecraft, H. R. Anderson, L. G. Despain and H. V. Neher . . . 47 (1967) 1
Array detectors and extended source used in a double focusing beta spectrometer, Ö. Nilsson, S.-E. Karlsson, I. Andersson, C. Nordling and K. Siegbahn . . . 47 (1967) 13
Nuclear lifetime effects on gamma-ray angular distributions from gas targets, G. J. McCallum and B. D. Sowerby 47 (1967) 45
Resolution and backscattering correction of continuous beta-ray spectra, E. Jacobs, L. Dorikens-Vanpraet, J. Demuynck and D. De Frenne . . . 47 (1967) 55
A study of the beam divergence in an electromagnetic isotope separator, I. Chavet and R. Bernas . . . 47 (1967) 77
A comparison of two detecting methods for time-of-flight measurements of thermal neutron spectra, E. Hiiberg 47 (1967) 89
Measurement of lifetimes up to one second of isomeric nuclear states populated in the decay of radioactive sources, J. Radeloff, N. Buttler, W. Kesternich and E. Bodenstedt . . . 47 (1967) 109
Triple angular correlation contour plots for the (p,$\gamma\gamma$) reactions, P. Taras and R. E. Azuma . . . 47 (1967) 116
A computer-coupled quality control procedure for gamma-ray scintillation spectrometry, D. F. Covell . . . 47 (1967) 125
Photographic emulsion plate camera for gas and solid targets, H. M. Sen Gupta, A. H. Khan, A. Hossain, A. Sabir and A. K. M. Nurannabi Khandaker . . . 47 (1967) 133
Derivative Mössbauer spectrometer, T. Bressani, P. Brovetto and E. Chiavassa . . . 47 (1967) 164

Method for least-squares analysis of gamma-ray scintillation spectra using a bent-crystal monochromator, J. E. Brown and E. N. Hatch 47 (1967) 18
Unified sputtering theory, W. Brandt and R. Laubert 47 (1967) 20
A method of high-resolution data acquisition, F. T. Seibel, N. R. Roberson, E. G. Bilpuch and H. W. Newson . 47 (1967) 24
Analysis of data from reactions of the form $A + B \rightarrow a_1 + a_2 + a_3$, P. A. Assimakopoulos and N. H. Gangas . . . 47 (1967) 26
A method for generating single gamma-ray shapes for the analysis of spectra, R. L. Heath, R. G. Helmer, L. A. Schmittroth and G. A. Cazier 47 (1967) 28
Analysis of gamma-ray spectra from NaI(Tl) and Ge(Li) spectrometers. Computer programs, R. G. Helmer, R. L. Heath, L. A. Schmittroth, G. A. Jayne and L. M. Wagner 47 (1967) 30
Doubly bent total reflecting tube as cold neutrons filter, C. Buzano, F. Demichelis and M. Rasetti 47 (1967) 32
The limit of identification for short-lived radioisotopes in activation analysis. The limit of measurement of half-life, S. Sterliński 47 (1967) 32
A broad range magnetic pair spectrometer for gamma rays of energy 5 to 50 MeV, J. R. Leslie and I. G. Main . . 47 (1967) 34
Determination of uranium and thorium ores using gamma spectrometry, J. M. Domingos and A. A. Melo 48 (1967) 2
A light pipe for very thin large area scintillators, E. Verondini 48 (1967) 4
DETEC, a subprogram for simulation of the fast-neutron detecting process in a hydro-carbonous plastic scintillator, B. Gustafsson and O. Aspelund 48 (1967) 7
Electron-photon cascade calculations and neutron yields from electrons in thick targets, R. G. Alsmiller, Jr. and H. S. Moran 48 (1967) 10
A particle identification system for use with 30 MeV ^{3}He particles, J. H. Broadhurst and G. J. B. Pyle 48 (1967) 11
An improved technique for measuring the half-lives of short-lived fission gases, O. L. Cordes, J. E. Cline and C. W. Reich 48 (1967) 12
An equivalent width on the Mössbauer spectrum, T. Yoshioka and H. Kohno 48 (1967) 19
Evaluation of Mössbauer spectra for ^{57}Fe, W. Kündig 48 (1967) 21
High sensitivity scintillation spectrometer for background neutrons, T. Doke, M. Adachi, S. Kubota, M. Tsukuda and E. Tajima 48 (1967) 24
A Ge(Li) spectrometer for studying neutron capture gamma rays, V. J. Orphan and N. C. Rasmussen 48 (1967) 28
Operation of a single wedge gap beta ray spectrometer and an on-line computer for the measurement of short lived beta spectra, A. J. Armini, R. M. Polichar and J. W. Sunier 48 (1967) 30
Electromagnetic separation of highly enriched noble gas isotopes in multimilligram quantities, E. Hechtl and F. P. Viehböck 48 (1967) 31
General properties of peaks in the sum-coincidence spectrum, I. L. Fairweather and D. A. Gedcke 49 (1967)
Preliminary design study for a computer-interfaced multichannel pulse-height analyzer for nuclear data, P. R. Bevington 49 (1967)
Bestimmung des Schwerpunktes von Teilchenschauern mit Hilfe der Doppelkeilmethode, K. Pinkau, C. Reppin und V. Schönfelder 49 (1967)
Direct determination of short-lived radon daughter products on air filters by liquid scintillation counting using a delayed-coincidence technique, G. Assaf and J. R. Gat 49 (1967)
A voltage-dependent-resistor dynode chain to reduce the variation of photomultiplier gain with counting rate, R. B. Galloway and D. G. Vass 49 (1967)
Automatic apparatus for α-γ angular correlation measurements, A. R. Lewis and J. P. Morris 49 (1967)
Calculation of Doppler-broadened cross sections directly from Doppler- (and resolution-) broadened cross sections corresponding to a lower temperature, F. H. Fröhner 49 (1967)
Measurement of elastic neutrons by organic scintillators, A. Chatterjee and A. M. Ghose 49 (1967) 1
Elimination of second order effects in triple-axis crystal spectrometers, G. Dolling and H. Nieman 49 (1967) 1
A charged particle spectrometer for space experimentation, M. C. Rinehart and R. G. Winslow 49 (1967) 1
A NaI(Tl) fast neutron time-of-flight spectrometer, A. S. Rupaal 49 (1967) 1
A special purpose discriminator for delayed neutron spectrum measurements, Ch. Mantakas, A. J. Nicolitsas and N. G. Chrysochoides 49 (1967) 1
Split-pole magnetic spectrograph for precision nuclear spectroscopy, J. E. Spencer and H. A. Enge 49 (1967) 1
The rotating crystal time-of-flight spectrometer for scattering law measurements with slow neutrons. Theoretical analysis and design considerations, F. Carvalho, G. Ehret and W. Gläser 49 (1967) 1
Coincidence losses due to pile-up in crossover-timing systems, S. L. Blatt 49 (1967) 2
A versatile electron-gamma correlation spectrometer, F. Falk, S. Törnkvist, H. Snellman and J. E. Thun . . . 49 (1967) 2
A new method for measuring the β-γ circular polarization correlation, H. Schopper, H. Behrens, H. Müller, J. Görres, W. Jüngst and H. Appel 49 (1967) 2
Investigations of a long-lived radiofrequency ion source, L. Vályi, P. Gombos and J. Roósz 49 (1967) 3
A large detector, anticoincidence shielded multidimensional gamma-ray spectrometer, N. A. Wogman, D. E. Robertson and R. W. Perkins 50 (1967)
Granular Mössbauer absorbers, J. D. Bowman, E. Kankeleit, E. N. Kaufmann and B. Persson 50 (1967)
Influence of photoelectron statistics on time-correlations in fast coincidence measurements, H. Halling, S. Mayerhofer, H. Nabielek and E. Ujlaki 50 (1967)
A spectrometer for neutron capture gamma ray studies, L. Broman 50 (1967)

nfluence des aberrations de sphéricité sur la transmission, la luminosité et le pouvoir séparateur d'un spectromètre β à trajectoires trochoïdales, D. Mugnier, P. Beuzit et J. Lafoucrière 50 (1967) 77
A new X-ray spectrometric technique, D. R. Koehler and J. T. Grissom 50 (1967) 87
A fast neutron time-of-flight spectrometer, C. J. Oliver, B. Collinge and G. Kaye 50 (1967) 109
A multiple counter for a beta spectrometer, A. A. Bartlett and D. L. Spenny 50 (1967) 125
Verfahren zur Messung der Flussdichten und Dosisleistungsäquivalente von Neutronen im Energiebereich zwischen thermischer Energie und 50 MeV, D. Nachtigall und F. Rohloff 50 (1967) 137
Neutron flux distribution from a 14 MeV neutron generator, H. F. Priest, F. C. Burns and G. L. Priest 50 (1967) 141
An intermediate-field radio frequency transition scheme for a source of polarized protons, A. W. Kuhfeld 50 (1967) 147
A simple automatic angular correlation system, A. Meulenberg, Jr., A. V. Ramayya, B. Van Nooyen and J. H. Hamilton 50 (1967) 157
Design study for a large angle ($\theta \rightarrow 180°$) scattering facility for charged particles, E. J. Burge 50 (1967) 209
Use of an IBM-compatible incremental magnetic tape recorder as an input/output device for a multichannel analyzer, M. Algranati, T. Nunamaker and M. W. Sachs 50 (1967) 213
Rotating crystal spectrometers with and without an auxiliary device for suppression of unwanted reflexions, G. Quittner and E. Legler 50 (1967) 251
Statistics of a two-parameter analyzer with associative memory, R. E. Bell 50 (1967) 258
Multi-angle fast neutron time-of-flight system, A. B. Smith, P. Guenther, R. Larsen, C. Nelson, P. Walker and J. F. Whalen 50 (1967) 277
Monte Carlo study of a method for lunar (surface) analysis based on spectroscopy of gamma-rays following 14-MeV pulsed-neutron bombardment, M. Leimdorfer and R. T. Boughner 50 (1967) 302
A method for automatic identification of peaks in the presence of background and its application to spectrum analysis, M. A. Mariscotti 50 (1967) 309

Nuclear Electronics

Instrumentation of a manually programmed neutron diffractometer, K. B. Hansen and K. E. Neisig 41 (1966) 61
A photomultiplier pulse shaper with minimal time slewing, incorporating a tunnel diode cascade trigger circuit, H. Verwey 41 (1966) 181
The use of derandomizers for the prevention of spectrum distortion, A. F. Arbel, A. Suhami and B. Sabbah . . . 41 (1966) 286
Determination of coincidence-circuit statistical parameters on the basis of a single empirical delayed coincidence curve, J. Kalisz. 42 (1966) 61
Some particular solutions for a nuclear counting chain, G. Colombo and L. Stanchi 42 (1966) 104
An analog and digital readout system for the circulating memory, V. Bonačić 42 (1966) 154
Signal to noise ratio in nuclear pulse amplifiers with high repetition rates, M. Bertolaccini, C. Bussolati and E. Gatti 42 (1966) 286
Contribution à l'étude théorique et expérimentale des fluctuations d'un periodemètre intégrateur logarithmique en régime aléatoire, H. van der Beken, G. Bonnet et V. Delcroix 43 (1966) 298
Zufällige Ereignisse, Pile-up und Summationen in einer Schnell-Langsam-Koinzidenz, D. Lange, H. G. Eckert und W. Haupt 43 (1966) 343
A compact low-inductance spark chamber pulser, S. I. Parker and C. A. Rey 43 (1966) 361
A modular 100 Mc/sec digital timer, M. Eckhause, R. T. Siegel and R. E. Welsh 43 (1966) 365
Dynamic behaviour of tunnel diode monostable circuits, N. Abbattista, M. Coli and V. L. Plantamura 44 (1966) 29
Etude de la résolution d'un préamplificateur de charges, G. Libs et G. de Rosny 44 (1966) 39
A print-out method for BCD weighted numbers – weight generators, G. Polychronakis and G. Philokyprou . . 44 (1966) 90
A diode function generator for identification of charged particles, A. Turos and A. Ziemiński 44 (1966) 119
A solid state nanosecond pulser using Marx bank techniques, E. A. Jung and R. N. Lewis 44 (1966) 224
A device for automatic digital deadtime correction of counting losses of single and coincidence counting rates, H. Seufert 44 (1966) 335
A new pulse height compensator for time to amplitude converters, P. Thieberger 44 (1966) 349
Un convertisseur amplitude-temps à grande dynamique, Ph. Catz et J. Majérowicz 45 (1966) 59
Contribution à la réalisation d'un analyseur multicanal à faible temps mort, J. Gorodetzky, P.-L. Wendel, Ch. Ring et R. Armbruster 45 (1966) 72
Etude de certaines particularités de fonctionnement des détecteurs à gaz fonctionnant en collection électronique. Application au controle des réacteurs, G. Bonnet, V. Delcroix et V. Q. Maï 45 (1966) 87
A 100 Mc/s 2 out of 3 gate, J. K. Whittaker 45 (1966) 138
A linear gate and integrator, G. White 45 (1966) 270
Improvement of high bandwidth coaxial transformers, J.-C. Balland, R. Gaillard, J. Pigneret and J.-J. Samuelli 45 (1966) 275
Simple counting electronics for use on high potential, H. W. Franz, D. Fick and E. Flügel 46 (1967) 106
Digital to analog pulser system for testing pulse height analyzers, F. M. Gardner and R. McKeethen 46 (1967) 121
Mise en forme réglable et précise à temps de recouvrement nul, R. Van Zurk 46 (1967) 125
A low noise, high input impedance, nanosecond pulse amplifier, M. Goyot, J.-J. Samuelli and A. Sarazin 46 (1967) 149
Effects of last dynode capacity in space charge saturation type pulse shape discriminator, T. Hiramoto, Y. Noda and T. Mizutani 46 (1967) 261

Acceleration controlled drive with constant acceleration for Mössbauer experiments, J. Pahor, D. Kelšin, A. Kodre, D. Hanžel and A. Moljk 46 (1967 28
Microwave planar triodes in preamplifiers of nuclear magnetic resonance spectrometers, B. Leskovar 47 (1967) 2
Reduction of pile-up effects in time and energy measurements, M. Moszyński, J. Jastrzebski and B. Bengston . . 47 (1967) 6
Some conclusions about filters in nuclear pulse amplifiers, S. F. Pinasco 47 (1967) 7
A new double delay line amplifier using one line only, S. Gorni 47 (1967) 7
Étude d'un trigger à transistor en régime d'avalanche avec application à un circuit de coïncidences rapides, M. Riedinger, F. Schmitt, G. Metzger, G. Sutter, P. Chevallier et C. Winter 47 (1967) 10
Générateur de doubles trains d'impulsions nanosecondes, J. Aveynier et C. Puthod 47 (1967) 14
Simplified accuracy estimation for the logarithmic counting-rate meter, C. H. Vincent 47 (1967) 15
An analysis of hysteresis in transistorized Schmitt circuits, A. I. Nizan and E. Elad 47 (1967) 23
The stabilization of pulse amplitudes in amplifiers with negative feedback, K. Fränz 47 (1967) 23
A transistorized time-to-amplitude converter, C. Dardini, G. Iaci, M. Lo Savio and R. Visentin 47 (1967) 23
Low-level pulse discriminators with back diodes and tunnel diodes, P. A. Tove, E. Petrusson and Z. H. Cho . . 47 (1967) 25
A new master-slave binary scaler design, P. M. Fenwick and J. B. Earnshaw 47 (1967) 26
Ein Zeitdiskriminator für schnelle Fotovervielfacher-Impulse, R. Conrad 48 (1967) 22
Solid-state log *n*-period system, J. S. Byrd 48 (1967) 29
A pulse shape discrimination circuit for lithium-drifted germanium diodes, U. Tamm, W. Michaelis and P. Coussieu 48 (1967) 30
Etude d'un générateur d'impulsions très haute tension pour application à un système de chambres à étincelles, G. Metzger, M. Riedinger, F. Schmitt, G. Sutter et P. Chevallier 48 (1967) 3
A time analysis system for life-time measurements, K. D. Clausen and T. D. Nainan 49 (1967)
Etude et réalisation d'un ensemble électronique destiné au suivage de traces dans une émulsion ionographique, J. P. Barbier, A. Bernheim, J. C. Fayolle et M. Morand 49 (1967)
A fast linear amplifier, P. F. Manfredi and A. Rimini 49 (1967)
A digitally-controlled precision pulser, J. Greenblatt, K. S. Kuchela and N. K. Sherman 49 (1967)
Fast timing circuit performances with tunnel diodes, N. Abbattista, V. L. Plantamura and M. Coli 49 (1967) 1
"Do-it-yourself" lock-in amplifiers – radio and audio frequencies, K. W. Lamers 49 (1967) 1
A simple particle identifier, R. Chaminade, J. C. Faivre and J. Pain 49 (1967) 2
Etude de l'effet du temps mort sur les mesures effectuées avec un sélecteur multicanaux à plusieurs voies d'entrée, G. Dumazet, M. Lambert, G. Lefevre et B. Picinbono 49 (1967) 2
Nonlinear delay lines and their applications in nucleonic instrumentation, A. R. Owens and G. White 49 (1967) 2
A fast computing circuit for particle identification using signals from a $\Delta E, E$ counter telescope, P. S. Fisher and D. K. Scott 49 (1967) 3
The influence of different pulse-formers on the efficiency of anticoincidence-gates, P. Polly 49 (1967) 3
Average pulse shape observation by sampling method and its application to pulse shape discrimination, A. Tojo . 50 (1967)
Design of a fast simple pulse amplifier, A. Tojo 50 (1967)
Tunnel diode pulse shape discriminator, B. Souček and R. L. Chase 50 (1967)
A transistorized linear gate, A. P. Mills 50 (1967)
An inexpensive multi-channel time analyser, R. R. Fullwood 50 (1967)
A tunnel diode zero crossing variable discriminator, O. A. Bernaola, A. Filevich and P. Thieberger 50 (1967) 2
Transistorized nuclear counting instruments for a low-level counting laboratory, S. Ragupathy 50 (1967)

Miscellaneous

Eine Kernresonanzanordnung zur Messung und Stabilisierung von Magnetfeldern zwischen 0.1 G und 20 kG, J. R. Tatarczuk und B. Ziegler 41 (1966)
A conversion function for calculating elastic scattering angular distributions, J. Nurzyński 41 (1966)
Comportement et critères d'utilisation de transistors sous irradiations nucléaires, J. Pigneret, R. Genre, Ph. Glotin, J. J. Samueli et A. Sarazin 41 (1966)
Etude théorique du refroidissement de bobines sans fer par plaques conductrices de la chaleur, D. Mugnier, P. Argou et J. Lafoucrière 41 (1966)
Self-supporting metal foils prepared from the oxides of the separated isotopes of rare earth elements, L. Westgaard and S. Bjørnholm 42 (1966)
Alpha – A computer program for the determination of radioisotopes by least-squares resolution of the gamma-ray spectra, E. Schonfeld 42 (1966)
Individual tracers for isotope dilution analysis of rare gases, J. H. Reynolds and R. Spira 42 (1966)
An extended nomogram for log *ft* values, R. I. Verrall, J. C. Hardy and R. E. Bell 42 (1966)
The determination of non-linear parameters and their standard deviations from least-squares residuals, N. P. Archer, W. V. Prestwich and G. L. Keech 44 (1966)
Approximations to immersion type electrostatic lenses, Gy. Páris 44 (1966)
Low-level tritium measurements in water, R. A. Allen, D. B. Smith, R. L. Otlet and D. S. Rawson 45 (1966)
The use of Fourier transforms in the unfolding of experimental data, R. H. Ritchie and V. E. Anderson 45 (1966)
Loading of nuclear research emulsions with diamond crystals, D. T. Goodhead, A. Z. M. Ismail and Y. Prakash 46 (1967)

Molecular plating, V. The influence of some experimental factors on the deposition yield, N. Getoff, H. Bildstein and E. Proksch 46 (1967) 305
Préparation de cibles nucléaires sur supports minces mesuré de la masse déposée par unité de surface, J. Jouanigot, G. Bardolle, J. Cabe, J. F. Chrétien et M. Laurat 47 (1967) 105
Variance reduction in the Monte Carlo method for determining the volume of multidimensional non analytic solids, J. F. Hague 47 (1967) 194
A computer program to evaluate the complex probability integral, M. R. Bhat and G. E. Lee-Whiting 47 (1967) 277
Remarks on the "method of effective counts" for combining experimental results, T. Sandor 48 (1967) 131
An improved technique for track profile measurement in nuclear emulsions, J. E. Hall and D. J. Zaffarano . . 48 (1967) 141
A fast identification of traces of silicon by activation analysis with 14 MeV neutrons, Y. Eden 49 (1967) 352
Target preparation techniques, S. H. Maxman 50 (1967) 53
Optimum design of experiments on exponential absorption with n observations, J. W. Hemingway 50 (1967) 61
Un prototype de lecteur de lumidosimètres, J. P. Baciotti, D. Blanc, J. L. Teyssier, H. François et G. Soudain. 50 (1967) 93
Microanalysis of light elements by means of (d, n) reactions, E. Möller, L. Nilsson and N. Starfelt 50 (1967) 270
Some effects of heating and drying on the properties of nuclear emulsions, J. N. Dyer and H. H. Heckman . . . 50 (1967) 292
A method of determining the fast neutron dose equivalent, L. De Franceschi 50 (1967) 321

Letters to the Editor

The potential use of Auger electrons for coincidence measurements of nuclear quantities, P. Sparrman, T. Sundström and A. Marelius 41 (1966) 138
Use of a nanosecond time gated Li-Ge detector for measuring de-excitation gamma rays from fast neutron scattering, L. E. Beghian, F. Hofmann and S. Wilensky 41 (1966) 141
A nuclear plate camera for gas and solid targets, A. Hossain, A. H. Khan and H. M. Sen Gupta 41 (1966) 145
Note sur l'amélioration de la luminosité d'un spectromètre β à double focalisation, G. Mauron et L. Schellenberg. 41 (1966) 147
Fluorescent screens for accelerators, D. Cohen and R. Roman 41 (1966) 149
Compensated iron channel with high screening factor for beam extraction from cyclotrons, R. W. Müller and B. Berkes 41 (1966) 151
A circuit for rejecting pile-up pulses, E. Fuschini, C. Maroni and P. Veronesi 41 (1966) 153
Charge-sensitive amplifier with non-critical components, W. F. Splichal, Jr. 41 (1966) 156
Examination of the Vývet photomultipliers type 61 PK 412 (spec.) in a high frequency voltage control regime, M. Vysočanský, L. Ondriš, L. Nagy, E. Lehotay, S. V. Mukhin, S. V. Rikhvizki, I. N. Semenyushkin and I. Raus 41 (1966) 157
High-resolution X-ray and electron spectrometer, E. Elad and M. Nakamura 41 (1966) 161
A fast calibration method for cyclotrons employing incremental target potential techniques, C. O. Blyth, C. M. Chesterfield and J. M. Morris 41 (1966) 164
A comparison of approximation schemes for calculating phase-space factors in the 1 to 10 GeV range, R. L. Childers and K. F. Galloway 41 (1966) 167
Proposal for an improved signal to noise ratio of large grid ionization chambers, W. Rödel 41 (1966) 169
Method to improve the figures of merit of electron spectrometers, U. Bäverstam, A. Johansson and T. R. Gerholm 41 (1966) 171
On the problem of optimum signal to noise ratio in amplitude measurements, M. Bertolaccini, C. Bussolati and E. Gatti 41 (1966) 173
Correction of ratemeter response with varying input at changes of reading scale, D. H. Pilgrim 41 (1966) 174
Integral transform methods for analysis of delayed coincidence experiments, P. Sparrman 41 (1966) 177
A simple method of recording spark chamber events, E. Quercigh 41 (1966) 355
Remarks on "A new method of track recording of spark chamber on magnetic thin films", E. Quercigh 41 (1966) 357
Der Richtstrahlwert der Plasma-Elektronenquelle, C. Munakata 42 (1966) 291
Spherical aberration of an electromagnetic quadrupole doublet, A. D. Dymnikov, T. Ya. Fishkova, L. P. Ovsyannikova and S. Ya. Yavor 42 (1966) 293
A non-intercepting beam position, beam current and pulse shape monitor for pulsed accelerators, J. J. W. Bogaards, Jr. and T. E. Drake 42 (1966) 297
Modulation methods for low-level counting in the presence of background, C. H. Vincent 42 (1966) 299
Détermination des coefficients d'autodiffusion par spectrométrie α, J. F. Marin et M. Coniglio 42 (1966) 302
A system for inserting radioactive sources in vacuum, P. Blasi, P. R. Maurenzig and P. Sona 42 (1966) 305
Liquid-nitrogen-cooled-adsorption neon-recovery system, B. M. Bailey and A. Buffington 42 (1966) 307
A method of determination of thermal neutron beam collimation, T. Inouye and K. Ogawa 42 (1966) 309
A new possibility for the determination of energy distributions of charged particles in solid state nuclear track detectors, G. Somogyi 42 (1966) 312
Low-energy spectra measured with 0.7-keV resolution, E. Elad and M. Nakamura 42 (1966) 315
A fast light pulser using a hydrogen thyratron, H. Tawara 42 (1966) 318
Apparent ghosts in three particle reactions, E. Norbeck and M. D. Mancusi 42 (1966) 321
Herstellung punktförmiger radioaktiver Präparate durch Verdampfen in einem Treibgasstrom, F. Rödel und G. Herrmann 42 (1966) 323

Dead time measurement of G.M. counters, L. Fava and V. Sangiust 42 (1966) 32
Experimental aspects of the use of carbon-hydrogen polarized proton targets, Th. A. Cahill 42 (1966) 32
Average energy per pair in p-type silicon with 5 MeV alpha particles, W. L. Buys 42 (1966) 32
Preparation of thick isotopic targets inside an electromagnetic isotope separator, E. Formann and F. P. Viehböck 42 (1966) 33
Activation techniques in the measurement of the ^{235}U content in depleted uranium, F. Rustichelli, G. Maracci and M. Bresesti 42 (1966) 33
Die Verwendung des Photovervielfachers XP 1021 in schnellen Szintillationszählern, R. Langkau und H.-H. Rühl 43 (1966) 36
Pressurized discharge chamber, R. Kajikawa, H. Kobayakawa, A. Masaike, Y. Ōhashi and A. Okada 43 (1966) 37
Circuit de mise en phase sur une fréquence de 100 MHz par transistor en régime d'avalanche, V. Goursky et H. Guillon 43 (1966) 37
A Ge(Li)-NaI(Tl) coincidence system with multichannel analysis, A. V. Ramayya, B. van Nooyen, H. K. Carter and J. H. Hamilton 43 (1966) 37
Variable energy beam extraction from the Manitoba cyclotron, J. J. Burgerjon 43 (1966) 38
A nomogram for designing tunnel diode monostable circuits, N. Abbattista, M. Coli and V. L. Plantamura . . 43 (1966) 38
A modified hypodermic syringe for liquid deposition of beta spectrometer samples, J. J. Pinajian 43 (1966) 38
Redrift treatment of Li-drifted silicon detectors, M. Jaskola and K. Nybø 44 (1966) 14
Valley-to-peak ratios for zero-thickness sources, V. K. Mohindra, R. M. Green and K. G. McNeill 44 (1966) 14
Gallium arsenide surface barrier diode as charged particle spectrometer, T. Kobayashi and S. Takayanagi 44 (1966) 14
Motion of a charged particle in an axially symmetric nonstationary magnetic field, B. V. Stanić 44 (1966) 14
Preparation of ^{24}Mg from ^{24}MgO, N. R. Chellew, R. K. Steunenberg and J. D. Schilb 44 (1966) 14
A display lamp for counter logic, T. Bowen and J. J. Jones 44 (1966) 15
Suggestions for improvements of timing circuits with tunnel diodes, N. Abbattista, M. Coli and V. L. Plantamura 44 (1966) 15
A simple formula for the transmission and absorption of monoenergetic electrons, B. N. Subba Rao 44 (1966) 15
Reliability of fractional registry of nuclear spectra, O. M. Bilaniuk and W. C. Elmore 44 (1966) 15
Monte Carlo calculation of source-to-detector geometry, I. R. Williams 44 (1966) 16
Detection of divergent alpha-rays and neutrons with multiple-wire spark counters of three types, S. Kawata . . . 44 (1966) 16
Magnetfelddiskriminator, R. Reimann und W. Schärer 44 (1966) 16
Inexpensive liquid nitrogen level control for cold traps, P. T. Perdue 44 (1966) 16
Numerical calculations of hyperfine interactions in perturbed angular correlations, R. Ballesteros and M. Salomon 44 (1966) 17
A simple method for determination of nuclear lifetimes in the region 10–100 days and its application to the decay of ^{181}Hf, L. Broman and K. Karlsson 44 (1966) 17
A liquid ^{3}He target for high energy nuclear experiments, I. Modena, V. Montelatici and F. Scaramuzzi 44 (1966) 17
Dead time correction of pulse height spectra with a computer, P. Paatero and K. Eskola 44 (1966) 37
The preparation of thin self-supporting boron films using a heated substrate, G. T. J. Arnison and R. J. Gilmour 45 (1966) 11
On measuring the absolute yield of 14-MeV neutrons by associated particle counting, J. C. Robertson and K. J. Zieba 45 (1966) 11
Digital analysis of perturbed angular correlations, E. Matthias and D. A. Shirley 45 (1966) 34
A Ge(Li) gamma spectrometer for (n,n′γ) measurements, G. H. Williams and I. L. Morgan 45 (1966) 34
The dispersion of distributions derived from folding simple distributions, R. A. Schrack 45 (1966) 37
An encapsulated lithium drifted germanium diode for gamma ray spectrometry, P. E. Gibbons, J. H. Howes and S. Pyrah 45 (1966) 39
The biased quadrupole: A method of steering accelerator beams, J. G. Cramer and F. H. Schmidt 45 (1966) 39
Messung von schwachen Magnetfeldern mittels Kernresonanz, R. Reimann 45 (1966) 33
A current integrator with automatic pulse height analyzer dead time correction, J. G. Page 45 (1966) 33
An executive program for a time-shared on-line computer system, J. G. Page and R. G. Clarkson 45 (1966) 33
Heavy ion identification using the power law technique, J. Cerny, S. W. Cosper, G. W. Butler, H. Brunnader, R. L. McGrath and F. S. Goulding 45 (1966) 33
Ratio of dispersion to magnification in magnetic mass spectrometers, I. Chavet 45 (1966) 33
A 14 MeV neutron time-of-flight spectrometer, D. T. Stewart 45 (1966) 33
Development of flat response counters by adjoint transport calculations, T. Nakayama, H. Tatsuta, H. Ryufuku and T. M. Olsen 45 (1966) 33
On the preparation of magnesium targets from MgO, S. Takayanagi, M. Katsuta, K. Katori and R. Chiba . . 45 (1966) 33
Energy accumulation of heavy ions by multiple traversal through a single tandem accelerator, G. Hortig 45 (1966) 33
A method for internal pair formation measurements of transitions from proton-gamma reactions, E. Spring . . . 45 (1966) 33
Ein einfaches oszillographisches Verfahren zum Abgleich von Nulldurchgangstriggern, R. Langkau 45 (1966) 33
Uniformity of metal foils, J. J. Ramirez and A. R. Quinton 45 (1966) 33
A simple pulse generator for testing nuclear pulse counting equipment, R. B. Galloway 45 (1966) 33
A multipurpose collimating system, M. Anwar Chaudhri 45 (1966) 33
A multiple-purpose alpha particle thickness gauge, M. Tatcher 46 (1967) 11
Comparison of calculated and experimental scintillation crystal photofractions, B. J. Snyder 46 (1967) 11
Beam position indicator and stabilizer in a scattering chamber, I. Kumabe 46 (1967) 11
Elektrochemische Phänomene bei der Abscheidung von Radionukliden aus Isopropylalkohol in homogenen Feldern, H. Grösswang und F. Grass 46 (1967) 11
Optimum noise conditions in a FET, S. F. Pinasco 46 (1967) 3

Peak/total-ratios for NaI(Tl)-crystals. A criticism, G. Bengtsson . . . 46 (1967) 356
A reply to a criticism, H. Leutz, G. Schultz and L. van Gelderen . . . 46 (1967) 357

Experimental Methods in Magnetism*

H. ZIJLSTRA. Philips Research Laboratories, Eindhoven

2 parts. 1967. 562 pages. Hfl. 85.– (198 s.)

CONTENTS:

Part 1: Generation and Computation of Magnetic Fields.
The magnetic potential. Expansion of the magnetic potential in spherical coordinates. Air-core solenoids. Iron-core colenoids. Appendices. References. Author index. Subject index.

Part 2: Measurement of Magnetic Quantities.
Measurement of magnetic fieldstrength. The magnetized state. Measurement of magnetization. Measurement of magnetostriction. Measurement of magnetic anisotropy. Resonance methods. Mesaurement of the hyperfine interaction. References. Author index. Subject index.

Nuclear Matter and Nuclear Reactions*

KEN KIKUCHI, Nagoya University, and MITSUJI KAWAI, Tokyo Institute of Technology

1968. Approx. 350 pages. Hfl. 50.– (117 s.)

This book describes various statistical aspects of complex nuclei, with an emphasis on fundamental properties of nuclei as an ensemble of nucleons. A description is given of two-body collisions in nuclear matter on the basis of a semi-classical model and without using sophisticated mathematics, and of nuclear reactions at low- and high-energies, especially on high energy reactions.
The book will prove useful as a textbook for the last undergraduate or first graduate year.

CONTENTS. Properties of nuclear matter. Two-body collision in nuclear matter. Aspects of actual nuclei. Nuclear reactions at lower energies. Nuclear reactions at high energy. References. Author index. Subject index.

Radiation Research*

Proceedings of the Third International Congress of Radiation Research,
Cortina d'Ampezzo, Italy, June-July 1966
Edited by G. SILINI, Laboratorio di Radiobiologia Animale, Roma

1967. 943 pages. Hfl. 120.– (280 s.)

The Congress was subdivided into the following twelve Symposia, each presided over by a leading scientist in the field: Energy deposition at the atomic level. Radiation-induced radicals. Radiation chemistry of water. Radiation effects on artificial polymers. Radiation effects on macromolecules of biological significance. Radiation sensitivity of genetic structures. Radiation mutagenesis. Mechanisms of cell recovery. Radiation effects on cell populations. Radiation and the origin of life. Biological effects of UV-irradiation. Photodynamic effects. An extensive subject index is included.

Previously published:

Radiation Effects in Physics, Chemistry and Biology. (Proceedings of the 2nd Int. Congress on Radiation Research, Harrogate, August 1962.)
Edited by M. EBERT and A. HOWARD.
1963, 524 pages Hfl. 50.– (117 s.)

Sources of Quantum Mechanics

Edited with a historical introduction by
B. L. VAN DER WAERDEN, University of Zürich

1967. 442 pages. Hfl. 50.– (117 s.; $ 14.00)

CONTENTS. B. L. van der Waerden, Introduction. Part I: Towards quantum mechanics. A. Einstein, On the quantum theory of radiation. P. Ehrenfest, Adiabatic invariants and the theory of quanta. N. Bohr, On the quantum theory of line-spectra. R. Ladenburg, The quantum-theoretical interpretation of the number of dispersion electrons. N. Bohr, H. A. Kramers and J. C. Slater, The quantum theory of radiation. H. A. Kramers, The law of dispersion and Bohr's theory of spectra. M. Born, Quantum mechanics. H. A. Kramers, The quantum theory of dispersion. J. H. Van Vleck, The absorption of radiation by multiply periodic orbits, and its relation to the correspondence principle and the Rayleigh-Jeans law. H. A. Kramers and W. Heisenberg, On the dispersion of radiation by atoms. W. Kuhn, On the total intensity of absorption lines emanating from a given state. Part II: The birth of quantum mechanics. W. Heisenberg, Quantum-theoretical re-interpretation of kinematic and mechanical relations. M. Born and P. Jordan, On quantum mechanics. P. A. M. Dirac, The fundamental equations of quantum mechanics. M. Born, W. Heisenberg and P. Jordan, On quantum mechanics II. W. Pauli Jr., On the hydrogen spectrum from the standpoint of the new quantum mechanics. P. A. M. Dirac, Quantum mechanics and a preliminary investigation of the hydrogen atom. Name index.
